

**Young scientists workshop  
'MASS SPECTROMETRY IN BIOLOGY AND MEDICINE'**

**Organizers**

The grim mixture of workshops held by invited top scientists will give the young enthusiasts plenty of exciting opportunities to find new topics of interest and improve their skills in mass spectrometry. Enjoy cutting edge of biological and medical mass spectrometry spiced with Russian hospitality!

- **Date:** November, 10-11
- **Venue:** MIPT, Dolgoprudny, Russia
- **Goal:** to discuss advantages in MS-profiling and its applications in biology and medicine

**Key issues:**

- Using 2DE, MS/MS and SRM technologies for protein quantification;
- Consolidation of genomics, transcriptomic and proteomic data in gene-centric format;
- MS and Clinical application;
- Informational resources for MS-knowledge generation.

**Register on the 2-nd International Conference**

to take part in the exciting open discussion
